

# Alberto Schianni

## Software Engineer / Full-Stack Developer

📞 (+39) 345 619 5966 - Varese, Italy ✉ alberto.schianni@gmail.com 🌐 albertoschianni 🌐 albertoschianni.com

### PROFILE

---

Software Engineer with 3+ years of experience in full-stack web development and SaaS platform customization. Strong background in JavaScript, TypeScript, Vue.js, Node.js, REST API design, and ERP integration. Hands-on exposure to requirement analysis, software architecture, and full project lifecycle delivery in agile environments. Active user of AI-assisted development workflows to enhance code quality, refactoring, and architectural reasoning.

### WORK EXPERIENCE

---

#### Software Developer

ESKER, Italy, Milan (Hybrid Working)

January 2025 - Present

- Designed, developed, and customized features on Esker's cloud-based SaaS platform using its proprietary TypeScript/JavaScript extension framework, working on both client and server side throughout the full project lifecycle (scoping, configuration, testing, go-live, and post-deployment support).
- Integrated the platform with multiple ERP systems (SAP, Microsoft Dynamics, Oracle) through REST APIs and XML-based data flows, ensuring seamless interoperability across Source-to-Pay (S2P) and Order-to-Cash (O2C) automation workflows.
- Led requirement gathering and analysis with international stakeholders and stakeholders, translating business needs into technical specifications and coordinating cross-functional teams (Sales, Product Management, International Technical Support) to ensure successful project delivery.

#### Jr. Web Developer

ELMEC, Italy, Varese (Hybrid Working)

June 2023 - December 2024

- Developed and maintained web applications, intranet management systems, and internal web services using Vue.js, Node.js, Express, and REST APIs, following Git-based workflows and code review practices in agile teams, contributing to a major technological renewal project for enterprise Italian clients.
- Modernized legacy interfaces and refactored business logic by introducing an optimized tech stack, improving maintainability and developer experience across the application lifecycle.
- Collaborated cross-functionally with software architects, backend engineers, DBAs, designers, and client stakeholders, translating requirements into production-ready features delivered on schedule.

#### Jr. Full Stack Web Developer Trainee

Boolean, Italy, Remote (Remote Working)

September 2022 - March 2023

- Completed an intensive 600-hour full-stack bootcamp covering JavaScript, Node.js, Vue.js, relational databases, and REST API design through hands-on projects replicating production-grade web applications.

### TECHNICAL SKILLS

---

**Programming Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS

**Frameworks** Vue.js, Node.js, Express

**Tools / Platforms:** Git, REST APIs, XML, AWS, MySQL, PostgreSQL, Puppeteer

**Methodologies:** Agile/Scrum, Code Review, Requirements Analysis

**LANGUAGES:** English (Professional Working), Italian (Native)

### EDUCATION

---

#### Boolean Career

Full-time Software Development Bootcamp (600 hours)

Remote, Italy

September 2022

#### IULM UNIVERSITY (Bachelor's degree)

Communication Media and Advertising

Milan, Italy

2018 - 2021

### EXTRACURRICULAR ACTIVITIES

---

#### Alumno, Silicon Valley Study Tour

Silicon Valley, California, USA

August 2023

- Selected participant in the Silicon Valley Study Tour, a 2 Weeks immersive program featuring seminars at Google, Meta, Cisco, Pinterest, Stanford, and other Silicon Valley companies. Gained direct exposure to startup culture, venture capital ecosystems, and international tech management practices.
